

ИНДИВИДУАЛЬНЫЙ ПРОЕКТ 3 ЭТАП

Коняева Марина НФИбд-01-21

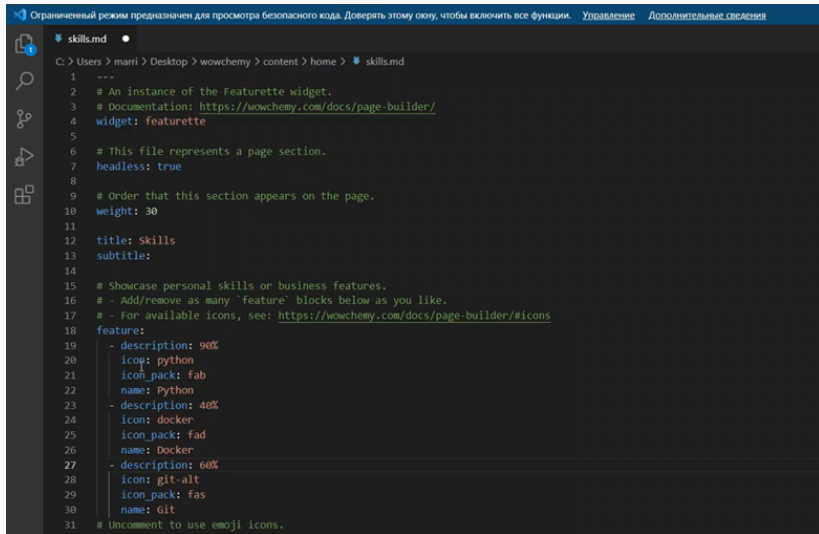

07.05.2022

Добавить к сайту достижения о себе и создадим новые посты.

1. Список достижений.
2. Добавить информацию о навыках (Skills).
3. Добавить информацию об опыте (Experience).
4. Добавить информацию о достижениях (Accomplishments).
5. Сделать пост по прошедшей неделе.
6. Добавить пост на тему: язык разметки Markdown.

Выполнение лабораторной работы

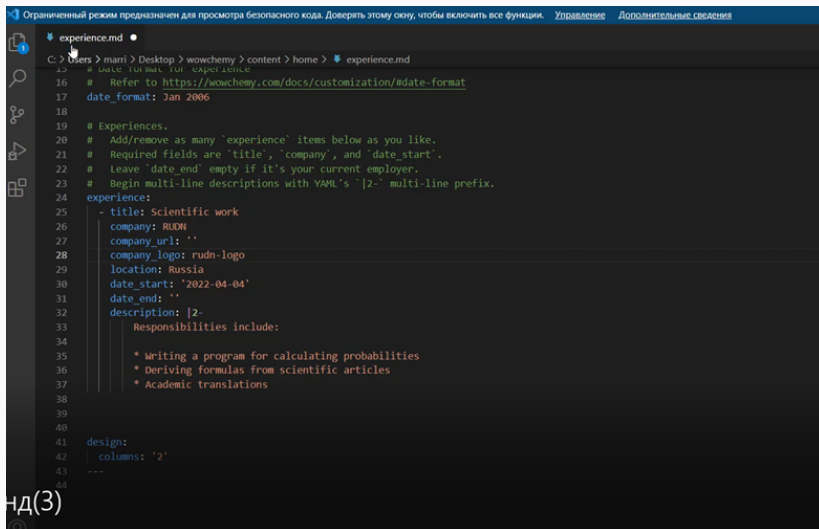

1. Добавим к сайту информацию о навыках, зайдя в нужный файл и изменив там данные

The screenshot shows a code editor window with a dark theme. At the top, a blue status bar contains the text: "Ограниченный режим предназначен для просмотра безопасного кода. Доверять этому окну, чтобы включить все функции." followed by links "Управление" and "Дополнительные сведения". Below the status bar, the editor displays the content of a file named "skills.md". The file path in the breadcrumb is "C: > Users > marri > Desktop > wowchemy > content > home > skills.md". The code is written in YAML format and includes comments in Russian. It defines a "Featurette" widget for the "Skills" section, with a weight of 30. It lists three features: Python, Docker, and Git, each with a description, icon, icon pack, and name. The Python feature has a weight of 90%, Docker has 40%, and Git has 60%. The code ends with a comment to uncomment emoji icons.

```

5. Создадим пост на тему Markdown

```
C:\Users\mani\Desktop\wowchemy> content > post > Markdown > index.md > ...
13 draft: false
14
15 # Featured image
16 # To use, add an image named "featured.jpg/png" to your page's folder.
17 # Focal points: Smart, Center, TopLeft, Top, TopRight, Left, Right, BottomLeft, Bottom, BottomRight.
18 image:
19   caption: ""
20   focal_point: ""
21   preview_only: false
22
23 # Projects (optional).
24 # Associate this post with one or more of your projects.
25 # Simply enter your project's folder or file name without extension.
26 # E.g. 'projects = ["internal-project"]' references 'content/project/deep-learning/index.md'.
27 # Otherwise, set 'projects = []'.
28 projects: []
29 ---
30 (3.1.jpg)
31
32 # Markdown Markup Language: Format Your Text
33
34 Markdown is a markup language for creating formatted text using a plain-text editor. Its key design goal is readability: the language is readable as-is, without an
abundance of tags or formatting instructions. This is in contrast to HTML, for example, which has obvious tags and formatting instructions that make it harder to read
for humans.
35
36 Markdown is used extensively by programmers in the software engineering industry. However, it's also widely used in:
37
38 blogging and CMS software (like WordPress),
39 instant messaging and chat (like Discord, Reddit),
40 online forums,
41 collaborative software,
42 (software) documentation,
43 creative files (with exceptions)
```

Изображение 5.1 пост на тему Markdown

В ходе выполнения данного этапа индивидуального проекта добавили к сайту данные о достижениях, опыте и навыках, а также создали посты.
